Faculty.

E. T. JEFFERS, D. D.,
PRESIDENT.

ALBERT B. CARNER, A. M.,
Professor of Mathematics and Drawing.

C. H. EHRENFELD, A. M., PH. D.,*
Professor of Chemistry and Physics.

MISS HULDAH ALLEN,
Belles Lettres and History.

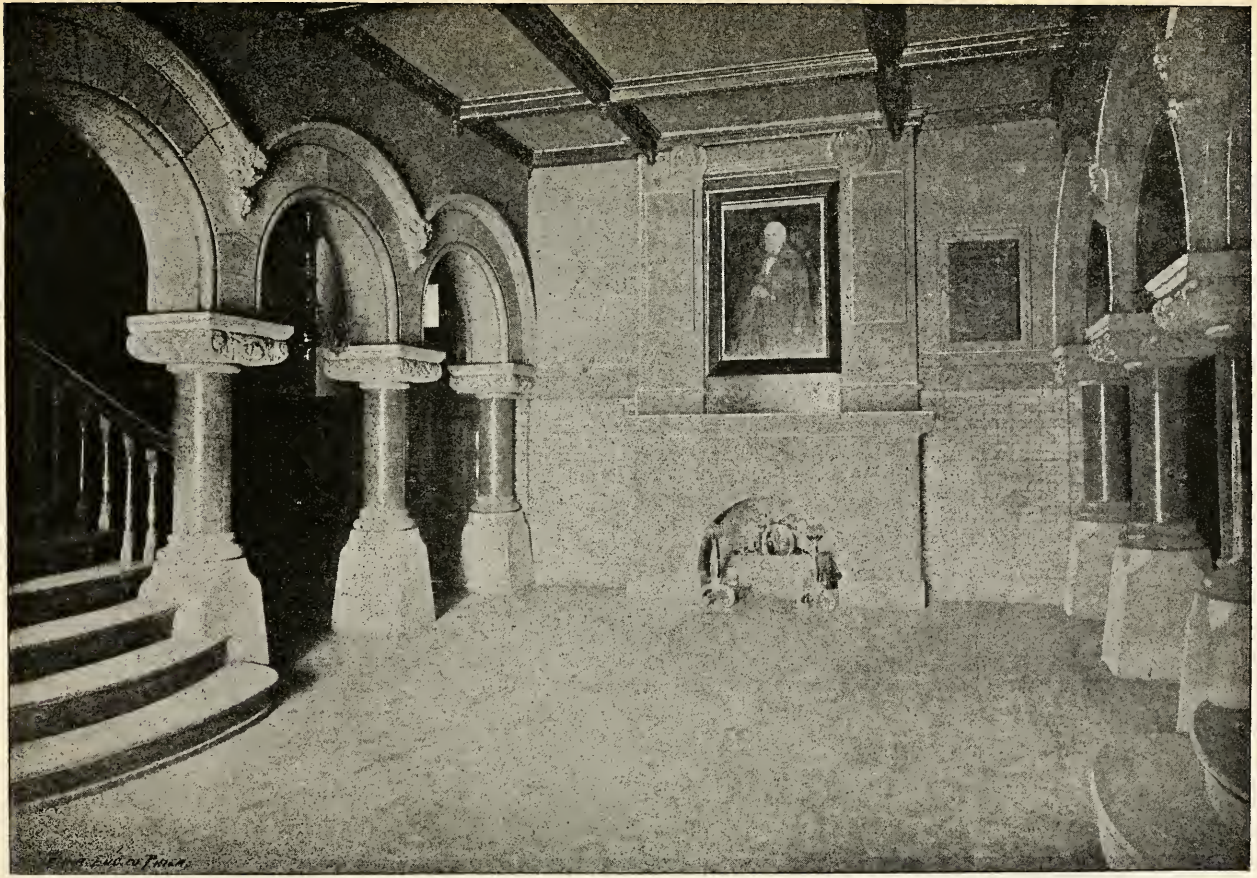
MISS M. S. BIXBY,
English, French and Elocution.

MISS MARY JEFFERS,
Professor of Latin and Greek.

FREDERICK EHRENFELD, A. B.,
Instructor in Chemistry and Physics.

MISS HATTIE POWELL,
Music.

*Absent on leave during year of '93-94



MEMORIAL HALL.

York Collegiate Institute.

FOUNDATION.

The York Collegiate Institute was founded by Samuel Small, to furnish the elements of a solid education at a small expense, so as to be practically within the reach of all.

To carry out this purpose he selected an eligible site in the Borough of York, comprising a half square of ground, erected a commodious building, furnished and equipped it thoroughly, and beautified the surrounding lawn, and laid out ample play grounds. He also provided a dwelling for the President of the Faculty and a boarding house adjoining for the accommodation of teachers and pupils from a distance. He conveyed the whole property to a Board of Trustees, in trust forever, and provided a liberal endowment.

This endowment has been increased by the generosity of the founder's widow, the late Mrs. Isabel Cassat Small.

There is also a Scholarship Endowment for the benefit of students who are preparing for the ministry.

The Cassat Library was a gift to the institution, and consists of more than two thousand volumes, specially selected.

THE BUILDING.

In December, 1885, two years after the death of the venerable Founder, the school building was destroyed by fire, and the year following a new building was erected and completely furnished and equipped by his nephews, Messrs. George Small, W. Latimer Small and Samuel Small, as a memorial to their lamented uncle.

The new building occupies the same site, and stands on the same foundation as its predecessor; but in the new design many defects of the old building have been removed, and many improvements made which add greatly to its capacity and convenience. Adjacent to the main building, and connected by a corridor, is the Laboratory, in the basement of which is

contained the steam apparatus for heating the buildings. By the isolation of the Laboratory and furnace the risk of fire is reduced to a minimum.

Communicating with the Memorial Hall, and also by corridors with the several cloak rooms, is the Main School Room. This is on the first floor, and is spacious, lofty and well lighted, affording accommodation, with single desks, for 175 pupils without crowding, and is comfortably furnished, and arranged in accordance with the latest improvements in educational requirements.

In the wings are six ample Recitation Rooms.

On the second floor, immediately over and equal in size to the main school room, is the Auditorium, with a seating capacity of six hundred.

The Library and Philosophical Lecture Rooms are on the third floor, fitted up with the necessary book and instrument cases and other requisite artistic furniture

The utmost attention has been given to the heating and ventilation of the entire building.

DESIGN.

The design of the Founder contemplated a thorough course of academic instruction and training, combined with practical Christian culture; and the distinctive aim of the Institution is to develop the moral along with the intellectual faculties, and inspire a love for learning and a genuine reverence for the sacred truths of our Christian religion.

The design is based on a broad and liberal catholicity, which is maintained purely and strictly without sectarian bias; and the administration of the school is pledged to absolute impartiality in regard to religious faith, and perfect respect for all. In all that pertains to this feature of the Institution the purpose is simply to maintain the healthful atmosphere of a Christian school.

The duties of each day begin with a short religious service; and every Wednesday afternoon there is a closing service consisting of a lecture and worship.

There is systematic instruction upon the main facts in the Bible once a week, covering the general outlines of Old Testament History, the life of Christ and the labors of the Apostles.

ENTRANCE.

Applicants for admission must pass an examination in spelling, reading, writing, geography, arithmetic through common and decimal fractions, and History of the United States through the war of 1812.

COURSES OF STUDY.

The studies pursued embrace a Classical Course and a Scientific Course. These courses are arranged to prepare students for the freshman class of any American college or scientific school, and they are adapted to secure broad, liberalizing and practical instruction and training for students who may not intend to pursue their studies further at any other institution.

THE MATHEMATICAL DEPARTMENT comprises a complete course in Arithmetic, including the metric system and commercial practice, Algebra, Geometry, Trigonometry and Surveying, including field work. For this latter subject the department is well equipped with an excellent transit and other necessary instruments. It also provides a practical course in Bookkeeping and two years work in Mechanical Draughting, including the usual geometrical work, perspective, and drawing from objects; it further offers post graduate studies in Analytical Geometry and other higher branches.

CHEMISTRY. Recitations from Shepard's Inorganic Chemistry are held throughout the third year; problems in stoichiometry and the writing of re-actions are given prominent attention. The student is put to work in the laboratory from the very beginning, and is first taught manipulation and the observation of chemical phenomena. This is followed by a course of general experiments, which the student is required to perform, as far as possible, himself. Notes are required on all work done. After finishing this course, qualitative analysis is begun and continued through the Senior year. For those who wish to carry the subject further, the laboratory is equipped with a balance, graduated vessels, and other apparatus for quantitative work.

An outline of organic chemistry is given from a full set of notes at the conclusion of the course in inorganic chemistry.

PHYSICS. The course in Physics extends over two years. The work of the first year is mainly descriptive and experimental. In the second year, while experimentation is still continued to some extent, attention is given chiefly to the mathematical application of physical laws. Gage's text books are used.

MINERALOGY. Dana's Manual is used in connection with the study of several hundred specimens. Blowpipe analysis is continued during two terms. Crystallography receives due attention, and is illustrated by a set of models of the principal forms of the six systems.

GEOLOGY. In connection with recitations from Winchell's Geological Studies, typical rocks, minerals, and fossils are examined. The class is also taken out for field work.

The collections intended to illustrate these subjects are by no means complete, and we would earnestly request all who are interested to aid us in enlarging them.

PRESENTATIONS. Zoological specimens to the number of one hundred were presented by the class of '94, Scientific Course.

MATERIAL FACILITIES.

The Philosophical Hall is furnished with complete apparatus for pursuing researches in Science, and a large and valuable collection of minerals illustrates the study of Geology and Mineralogy.

The Chemical Laboratory, which is detached from the main building, is complete in all appointments, and supplied with the most modern appliances for practical work.

The Cassat Library, containing more than two thousand well selected volumes of choice literature, affords opportunity for private research and advanced literary culture.

The Gymnasium is equipped with appliances for systematic exercises, which is especially important during the winter season and when the weather forbids outdoor exercise.

The Mathematical Department possesses an excellent engineer's transit and other necessary instruments, and classes in surveying are given practice in actual field work.

PUBLIC EXERCISES.

The students of the Senior Class deliver orations and read essays at a public entertainment held at the close of the spring term.

Founder's Day is observed on April 14th, as a holiday, and a literary address, by one of the Alumni, is delivered in the evening. The orator, for '94 was S. J. McClenaghan, '84, S. Orange, N. J.

The Phi Sigma Society, which is maintained by the young men, with the co-operation of the Faculty, holds weekly meetings, with the usual literary and parliamentary exercises. The Society also holds semi-annual evening receptions for invited guests.

The Society of the Alumni, numbers now 195 members. The President of the Society, for the coming year, is John L. Jessop, '90, York, Pa. The Corresponding Secretary is Miss Clara Bressler, of York, Pa. The Society has held its annual meetings for the last three years on the evening of Foundr's eay, but at the meeting held April 13, '94, it was decided to hold the annual meeting hereafter during Commencement week.

BOARDING.

Under the supervision of the President of the Faculty, arrangements may be made for students, who are not residents of York, to secure suitable accommodations in private boarding houses. The regulations in these cases are such as experience suggests to be the best for the safety and well being of the students and the good reputation of the Institution. The expense varies from $3.75 to $5 per week.

EXPENSES.

The liberal endowment of the Institution renders it possible for the tuition to be placed at the almost nominal sum of $40 per annum, which is payable in proportionate amounts at the beginning of each term, viz:

First term, Sept.–Jan., ...	$20.00
Second term, Feb.–June, ...	20.00

EXTRAS.

Music, Piano, ...	$40 per annum.
Type Writing, ...	10 " "
Chemistry, for materials, ...	5 " "
" for breakage,	actual cost.

DISCOUNT AND RAILROAD FARES.

A discount of fifty per cent. is allowed to children of clergymen of any religious denomination, and of ten per cent. to a family furnishing more than one student.

New students are charged from the date of their entrance, and all students to the end of each current term.

In case of protracted absence on account of sickness or other just cause, students are charged one half the regular amount for the time they are absent.

Commutation tickets may be procured at a low rate from the railroads for the use of the students who come in to attend the Institute in the morning and return in the evening.

SCHOLARSHIPS.

The Coleman Scholarship Fund yields an annual income of $150 each for seven Scholarships, payable at the end of each quarter. These Scholarships are awarded by the Board of Trustees, and are available to aid in defraying the expenses of students while they are at the Institute preparing for col-

lege, and who intend to enter the ministry of the Presbyterian Church. Students desiring Scholarships must be recommended as candidates for the ministry by their Presbytery to the Westminister Presbytery, and be approved by the Faculty and Trustees. An applicant for a Scholarship should be prepared to enter the second year of the Classical Course.

Correspondence is invited on this subject, to be addressed either to the President of the Board of Trustees or the President of the Faculty.

GRADUATES—HONORS.

In 1893 the following were graduated in the Classical Course: William M. Gamble, Hugh McDougall, Jr., Samuel Small, Jr.; in the Scientific Course, George Hay Kain, Frederick D. Stickter; in the Ladies' Course, Anna D. Gamble, Anna L. Huber, Margaret E. Jordy, Lydia F. H. Walker.

The First Honor was awarded to George Hay Kain, the Second to Frederick D. Stickter and Hugh McDougall, Jr.

CASSAT LIBRARY.

CURRICULUM.

FIRST YEAR.

CLASSICAL AND SCIENTIFIC.

LATIN:

1st Latin Book.

Grammar.

Cæsar's Gallic War, Bk. II.

REPORTS AND DIPLOMAS.

Reports of attendance, scholarship and deportment are sent to parents or guardians at the end of each term.

Diplomas will be awarded to those students who complete the course of study in a satisfactory manner.

APPOINTMENTS, JUNE 10--15, 1894.

Sermon before the graduating class by the President, Sabbath, June 10th, 8 p. m.

Phi Sigma Reception, Tuesday evening, June 12th.

Re-union of class of '84, Wednesday evening, June 13.

Class day, '94, Wednesday, 8 p. m.

Commencement, Thursday, 10 a. m.

Unveiling Tablet to Memory of Dr. McDougall, with address by Rev. Harry Anstadt, of '87, after the commencement exercises. Alumni meeting after the address.

Entrance examination 9 a. m., Friday, June 15, also on Friday and Saturday, September 7th and 8th at 9 a. m.

The twenty-second year will begin September 10, '94 at 9 a. m.

Terra Firma Flats

Officers of Various Organizations.
